SUPERIOR FUNCTION MEETS SOPHISTICATED DESIGN

# KONE Design Collection

# KONE Design Collection

## Superior function meets sophisticated design

Rapid urbanization is changing the face of cities across the globe. We want to offer our 100 years of elevator expertise to help you achieve the highest standard of elevator functionality and design in your new buildings.

### **A focus on function**

KONE elevators are reliable, safe and eco-efficient. They provide a smooth ride, superior acceleration and deceleration and precision leveling. Our cars are designed according to the accessibility standards and utilize durable materials and energy-efficient lighting.

### **Raising design to new heights**

Functionality alone is not enough. For this reason KONE design professionals have created the KONE Design Collection, a series of car interior designs to

create the best possible user experience. The starting point of each design is the overall ambience of the interior. We support this ambience with the lighting and the materials. As a final eye-catching touch, we add the car-operating panel with colors and graphics that match the interior.

### **Professionally designed or custom interiors**

The KONE Design Collection that is presented in this brochure has been inspired by the elements wood, fire, metal and water. You can either choose from one of the designs in the collection or create a custom design based on a wide range of materials. The end result is a quality car interior based on a wide range of materials and accessories that matches the interior of your building – without paying a premium.

# Value Collection

Cost-effective and attractive design

When you need to limit costs while still maintaining a stylish result, our Value Collection gives you quality interior materials at a competitive price. Walls are either painted steel or brushed stainless steel and the floor is popular PVC.

# Value Collection

Wood 101, Painted steel

Ceiling LF94, PP18 Walls PP10 Mirror PH2 Handrail HR31AW Floor D-6

Fire 102, Stainless steel

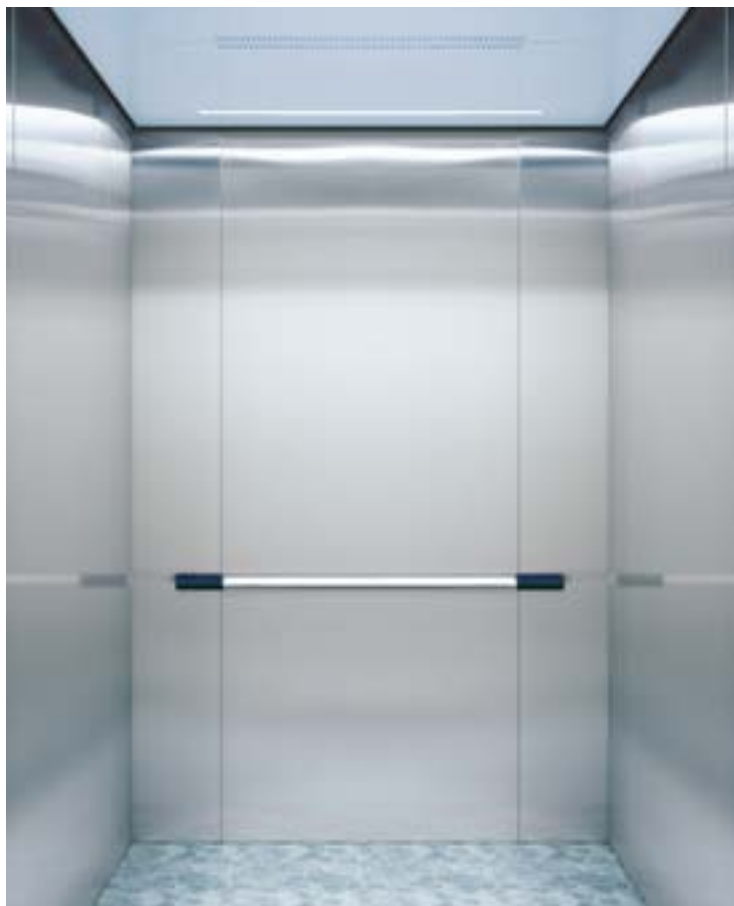

Ceiling LF66, PP10 Walls ST4 Handrail HR31AW Floor D-9

Metal 103, Painted steel

Ceiling LF66, PP10 Walls PP1, PP10 Mirror PH2 Handrail HR31AW Floor D-12

Water 104, Stainless steel

Ceiling LF94, PP19 Walls ST4 Handrail HR31AB Floor D-7

# Classic Collection

## Sophisticated design

When your customers want more quality, our Classic Collection is the right choice. Cars include one mirror-finished stainless steel panel with the remaining surfaces either powder-painted steel or brushed stainless steel. These wall materials are combined with the PVC flooring.

# Classic Collection

# Add the final touch with KONE Design signalization

KONE Design signalization is an excellent choice for customers wishing to match their car interior design with the car operating panel (COP). The COP is available in full height and partial height versions. Landing signalization is available in a variety of colors to suit any building interior. The signalization series has many contemporary features, including:

- Frameless numerical floor displays
- Sleek metallic frames
- A wide choice of faceplate colors and patterns made of durable polycarbonate that is both shatterproof and impact resistant
- Easily changeable faceplates

For more information about KONE Design signalization options, please ask our sales personnel.

KONE provides innovative and eco-efficient solutions for elevators, escalators and automatic building doors. We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernization. KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings.

Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life-cycle of the building. We challenge the conventional wisdom of the industry. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE MonoSpace® KONE MaxiSpace™, and KONE InnoTrack™. You can experience these innovations in architectural landmarks such as the Trump Tower in Chicago, the 30 St Mary Axe building in London, the Schiphol Airport in Amsterdam and the Beijing National Grand Theatre in China.

KONE employs over 34,000 dedicated experts to serve you in around 50 countries.
