

GOODS LIFTING SOLUTIONS

Scissor Lifts

KONE Scissor Lifts

KONE has a range of scissor lift solutions designed for vehicle loading and unloading. Manufactured to KONE's renowned high standards the range includes both model and bespoke options with capacities of up to 10,000Kg.

Docklift

Pit installed docklifts are ideal for environments where regular heavy use is required. Designed for easy trouble free operation the docklift fully retracts into a shallow pit providing a trip free flush floor surface. KONE docklifts are powered by electrically-driven ultra smooth hydraulic rams. Operation of the docklift is via a constant pressure push-button switch on a conveniently situated control console or hand held pendant controls. To ensure safety the docklift is fitted with chainmail guarding, electrically interlocked gates or safety barriers.

KONE's market leading heavy duty docklifts with a capacity of up to 10,000Kg can also be supplied to serve double deck trailers.

Dockloader

Capable of lifting loads of up to 5,000Kg the KONE dockloader is self enclosed and only requires a shallow pit (closed height between 130mm to 160mm) to make it flush with the surrounding surface.

The KONE dockloader can also be surface mounted providing the benefit of easy re-siting without the need for building work.

Portaloader

In many environments a portable loading platform can provide a solution to speed up the loading and unloading of a vehicle. The KONE Portaloader can easily be moved using its detachable steering unit and can be specified to lift and lower loads of up to 5,000Kg.

Key facts

Docklifts & dockloaders

- Capacities up to 10,000Kg
- Platform widths up to 2,000mm
- Platform lengths up to 5,000mm

Portaloaders

- Capacities up to 5,000Kg
- Platform widths 1,500mm to 2,400mm
- Platform lengths 2,200mm to 3,000mm

All products

- Suitable for internal and external applications
- Supplied with either a console control mounted to the handrail or a hand held pendant with constant pressure push buttons
- Supply 415V, three phase, 50Hz + neutral
- Compliant with EN1570

Quality, maintenance, repairs & service

When you choose a KONE product solution you are assured that quality, durability and safety are inbuilt in its production, irrespective of manufacturing source. Invariably our specialist equipment is installed into locations where heavy usage is normal. As a result the equipment will require skilled routine maintenance and occasional repairs, to support this need KONE has a range of tailored maintenance solutions for your business.

KONE provides innovative and eco-efficient solutions for loading bays and access, doors, elevators and escalators. We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernisation. KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings.

Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life-cycle of the building. We challenge the conventional wisdom of the industry. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE UniDrive™, KONE MonoSpace®, KONE MaxiSpace™, and KONE InnoTrack™. You can experience these innovations in architectural landmarks such as the Trump Tower in Chicago, the 30 St Mary Axe building in London, Schiphol Airport in Amsterdam and the Beijing National Grand Theatre in China.

KONE employs over 30,000 dedicated experts to serve you globally and locally in 49 countries.
