MODERNISATION AND MAINTENANCE SOLUTIONS

KONE UniDrive® Retrofit Kit

KONE UniDrive®

The KONE UniDrive® is a unique product for the door service market capable of upgrading and controlling almost all manufacturers door operators. KONE UniDrive® is suitable for almost all types of door configurations and door gear making it the ideal solution for performance improvements to existing systems.

In addition, for modernisation and upgrade purposes, KONE have developed the KONE UniDrive® Retrofit Kit. The Retrofit product enables full replacement of the mechanical and electrical parts of a door with new KONE parts. With this modernisation we can ensure that your door complies with the latest standards regarding safety, durability and efficiency, without making any changes to the construction of the doors.

The solution

The KONE UniDrive® is developed especially for upgrading and repairing the control element of your door. It can be used without changing the appearance of your existing door operator or doors. However, with upgrades of this kind there may be some occasions when it is necessary to replace all mechanical and electrical parts of the doors. Additionally, KONE can, of course, supply new door panels and door headers should these be needed.

The KONE UniDrive® meets and exceeds the latest standards regarding safety, durability and flexibility. Due to the nature of its design, it allows a door's operation to be highly customised for its environment from the most basic operational settings to the most advanced.

It's even possible in some cases to upgrade existing doors with a KONE Doors Retrofit Kit saving both time and expense in helping to make your building user-friendly for the disabled and compliant with the Disability Discrimination Act (DDA).

The benefits:

- Easy to install with no modifications needed to the existing doors or surrounding areas
- Independent maintenance is possible
- Modular set up allowing many different configurations
- Service indicator and self controlling mechanism for maximum safety and efficient operation
- Small in size so can fit the smallest of headers
- Up-to-date with the latest technologies and standards
- 'Plug-and-play' installation which decreases door down time
- Highly adjustable to meet each specific customer's requirements.

Quality, maintenance, repairs & service

When you choose a KONE product, you choose a product that guarantees the highest standards in quality, safety and durability. However, doors will require routine maintenance and occasional repairs, to supply this need KONE has a range of maintenance and service contracts that offer tailored solutions for your business.

KONE provides innovative and eco-efficient solutions for doors, elevators and escalators. We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernisation. KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings.

Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life-cycle of the building. We challenge the conventional wisdom of the industry. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE UniDrive™, KONE MonoSpace®, KONE MaxiSpace™, and KONE InnoTrack™. You can experience these innovations in architectural landmarks such as the Trump Tower in Chicago, the 30 St Mary Axe building in London, Schiphol Airport in Amsterdam and the Beijing National Grand Theatre in China.

KONE employs over 30,000 dedicated experts to serve you globally and locally in 49 countries.
