

Dedicated to People Flow™

A FLEXIBLE AND COST-EFFICIENT SOLUTION

KONE ReFine™ modular elevator upgrade

Your old elevator can work and look like new without a major construction project

The individual components and systems of an elevator have different lifecycles. Some last for decades while others may be out of date.

Why upgrade with KONE ReFine™?

- The elevator car interior may be worn and scratched
- Electrification systems installed twenty years ago may be out of date
- Regulations and standards may have changed
- Usage of the building might have changed
- There may be elderly people or children who require more safety and accessibility
- Energy costs have risen - replacing a few components could reduce electricity consumption

More safety and reliability in less time

With KONE ReFine modular upgrades, you replace only the components that need to be replaced. In a short time you can have an upgrade that improves performance, safety, reliability and energy-efficiency, with less downtime, lower cost and less disruption.

How can you be sure what needs to be done?

Before you begin, it makes sense to see what needs to be done. The KONE Care for Life™ analysis is free and there's no obligation to you. The KONE service technician examines the condition and performance of your elevator. The result is a report that tells you what needs to be repaired, together with a plan on how to get your elevator back in top condition.

Get started quickly

KONE can provide assistance from planning, to project management, to final handover.

The KONE Project Manager or Supervisor carries out a detailed site survey to determine the best solution and the best way to implement it. Especially important is to plan safe access for residents, visitors and technicians during the project.

Less disturbance during installation

Many KONE ReFine upgrade projects can be completed within a few days. In these cases they can be scheduled to minimise disturbance. During installation, KONE protects floors and walls to ensure that no damage is done, and takes care of the safe, environmental disposal or recycling of the old equipment. When the project is complete, KONE performs the final safety and performance inspections.

KONE ReFine™

is a modular upgrade solution that enables you to replace individual components and systems, which are available separately.

KONE RePower™

is a comprehensive modernisation package designed to be easy to order and install. The basic package includes the hoisting, controller, electrification, car, car door, and signalisation.

KONE RePlace™

is a cost-effective full replacement solution that provides you with a completely new elevator. KONE RePlace includes all of the equipment inside the shaft and the landing doors. KONE RePlace, keeping existing landing doors, is also a completely new elevator, but without replacing the landing doors.

Three levels of modernisation

KONE provides three ways to modernise your elevator: KONE ReFine™ modular solutions, the KONE RePower™ modernisation package and KONE RePlace™ full replacement.

KONE ReFine™ modular components

KONE hoisting solutions

Replacing worn, outdated hoisting machinery improves safety and ride comfort.

KONE electrification solutions

Upgrading the elevator's electrification improves performance and eco-efficiency.

KONE signalisation solutions

KONE elevator signalisation solutions provide attractive choices for designs, colours and patterns.

KONE elevator car solutions

KONE elevator car upgrade solutions integrate smoothly with existing installations.

KONE door solutions

KONE elevator car and landing doors are smooth and quiet, improving accessibility, safety and comfort.

KONE provides innovative and eco-efficient solutions for elevators, escalators, doors, loading bays and access. We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernisation. KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings.

Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life-cycle of the building. We challenge the conventional wisdom of the industry. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE UniDrive™, KONE MonoSpace®, KONE MaxiSpace™, and KONE InnoTrack™. You can experience these innovations in architectural landmarks such as 30 St Mary Axe and Broadgate and 201 Bishopsgate buildings, BAA Terminal 5, Emirates Stadium, Brunel University, Citigroup, Jubilee Line and St. Georges Wharf.

KONE employs approximately 35,000 dedicated experts to serve you globally and locally in 50 countries.
