

the whole is greater than the sum of its parts

The Alliance for Sustainable Built Environments is a group of industry leaders who practice and are recognized for their leadership in sustainability; that is economic, social and environmental responsibility. It is committed to delivering high performance, sustainable solutions for the built environment.

For Alliance information, call 866.913.9473 or visit www.greenerfacilities.org.

Alliance for Sustainable Built Environments

CATALYSTS

for change

Alliance for Sustainable Built Environments

Our planet can no longer sustain the growth-oriented consumption that has been standard practice for centuries.

We need to find sustainable solutions that not only address the most pressing issues of today but speak to those key issues that lie just beyond tomorrow's horizon.

The ultimate goal of the Alliance for Sustainable Built Environments is to transform the marketplace: to make green building best practices industry standards. To that end, we strive to raise awareness of sustainable development and promote the triple bottom line benefits delivered through high performance green buildings.

Separately, each member organization brings a piece of the sustainability puzzle to the fore. Together, we can initiate significant change and help the building industry create healthier, safer and more productive workspaces that generate savings, improve social conditions and lessen their impact on the natural environment.

Johnson Controls is the single largest provider of sustainable energy solutions in the world. Its dedication to helping clients reduce their energy use and their greenhouse gas emissions has earned Johnson Controls multiple national and international awards and recognition as a leader in sustainability.

Kohler Co. has remained true to its founding vision of defining the frontiers of ideas, craftsmanship and technology. Kohler strives to establish new levels of excellence within each industry and market it serves "improving the level of gracious living" of each person who is touched by its products and services.

At Milliken Carpet, product life extension is at the core of its environmental strategy. The Comfort Plus® cushion backing system extends the carpet's life by up to 50%. Milliken carpet tile products are 100% PVC-free and are engineered for end of life renewal through our Earth Square® process.

USG emphasizes sustainable innovation in its products, from the ingredients chosen to the processes used. USG's market leading products include gypsum wallboard, joint compound and related gypsum products; cement board; gypsum fiber panels; ceiling panels and grid.

KONE, a global leader in vertical transportation systems, develops products and solutions that are environmentally sound throughout their lifecycles. It improves the environmental efficiency of its solutions by incorporating energy saving technologies that keep the total cost of ownership low while reducing the ecological footprint of buildings.

Members of the Alliance for Sustainable Built Environments

Philips has worked to improve social equity and environmental quality, proving that responsible business is good business. With its tradition of integrating economic, environmental and social issues, Philips understands that sustainable development is one of the most challenging issues facing the world.

Forbo Flooring is committed to providing "best value" solutions in resilient flooring. Forbo was the first flooring manufacturer in the world to attain ISO-9000 and ISO-14000 certification, and its Marmoleum® has been awarded more independent environmental certifications than any other flooring material.

Owens Corning is a leader in building materials and composite systems with more than 65 years in the business of making homes and commercial buildings warmer, drier, quieter, more durable, energy efficient and attractive. Owens Corning is leveraging a heritage of innovation for a sustainable future.

JohnsonDiversey is a leading global provider of world-class commercial cleaning products and services. Its history of commitment toward the environment and community has earned respect as a sustainability leader, providing real solutions and value while setting the standard in healthy, high performance cleaning.

Eaton is committed to sustainability. Its PowerChain Management solutions help customers achieve their business goals, manage their energy resources wisely and maintain their environmentally sustainable enterprises. Eaton's products help conserve energy and increase efficiency while contributing to LEED credits.
