R7

Creating the best overall elevator experience takes more than mixing and matching the materials and components. Our comprehensive approach creates a whole where the components work harmoniously together in a unique way.

The starting point is the overall ambience of the interior. We support this ambience with the lighting. Then we match the feeling with the materials. As a final eye-catching touch, we add the new car operating panel with colours and graphics that match the interior. The end result is the KONE Design collection - ready to use, ready to experience.

In this new release, the focus is on lighting and the car operating panel. The new integrated lighting and ceiling designs are based on highly eco-efficient and space-efficient solutions. The Design signalization is the next generation of elevator signalization – it can be fine-tuned for any context with different colour and pattern options. In addition, new eco-friendly materials are also available in our set of Nature Inspired car interiors.

Anne Stenros, TKT
Vice President, Design
KONE Corporation

KONE DESIGN COLLECTION

The KONE *FourSeasons*™ Design Collection received the GOOD DESIGN™ 2008 award, as awarded by The Chicago Athenaeum: Museum of Architecture and Design.
